...The reviews, that is! I can't wait to get my Pi's running. Why, when the rest of the world is in a recession does my business take off and keep me working 7 days a week?! I guess I should be thankful but I just have to get the music cookin'. I am curious: how long are your magnet wire cables and your interconnects? I am thinking of placing the Paramours a foot or two from the Pi's and running longer interconnects from the Foreplay. Also, what's the latest on the woofer Zobel concerns?Garland
