Subject: Portable system help please Posted by Andy.G on Mon, 11 Mar 2002 05:42:17 GMT View Forum Message <> Reply to Message

A mate wants an easily portable small 12v system, to run off a car battery, to give him some outdoor amplification for his double bass. Seems that car amps would be the way to go maybe?, with a super efficient 10" or maybe pair of 8" pa drivers (any suggestions as to drivers please).Needs to be able to run for 2-3 hours at a charging, preferably longer.
