Thats list price, it says "shop around and we'll beat any price" on the top of the page, he's a good guy, he stuck to it. I quoted him the dealer prices I get from Image for the delta 15, he said he would beat them buy a buck, he didn't have 15's in stock, but he said he had a lot of kappas, and would give em to me for $55.Origianl response(after quoting a few random eminence drivers):> > Hi, Those are very good prices. they are> > distributors and they are quoting our dealer cost> > for their prices..and I called and they don't have> > all of those in stock but in the spirit of> > competetion, I will beat those by a buck...DaveThen I asked about the Delta 15A, PSD2002, h290,...His response:"HI Daniel, Yes those prices are our costs...I guess I should modify our beat the price claim to 'Beat any dealer price' One thing, if you could use the kappa 15 instead of the delta 15...we stock those here and could do those for 55 ...just a few bucks more but 400 rms...Dave"
