You Bet!This is going to be a good show. Lots of quality components and lots of good people. Mike Baker has done a great job turning this into a major event from an idea of a gathering. Lima will be common ground for everybody to unite no matter what system you may think sounds best. All the systems will sound good and we will have lots of fun testing, experimenting and just listening.did someone say there was beer in that town? Bill:::mumbles while walking out of the room:::guess i'll have to bring a good cd and a glass....
