I recieved the first two... dang heavy.Very slick looking. Curved cone, no ribs. Cast frame is pretty cool, funny, the texture and paint makes it feel like plastic. Terminals are spring, though really hard springs.Just sitting in their shipping boxes, these things sound great! and real efficient too. I think I'm gonna like these. When I get them 4Pis built I'll swap the delta 15's to see how these sound.Wow! really good highs, I don't know what response is like on these, but it sounds like it goes way up(voices don't sound muddy at all, even off axis)... may be even useable to 3 or 4k?I'll keep ya posted if I do anything with them.Model number is M252-8 $108.25 = qty. 2 (8.25% CA sales tx).Each comes with a glued foam rubber gasket on front and a paper gasket for the back I guess.
