There was an episode where a network executive offered Jerry a pilot on TV. Jerry took his friend George Costanza in as a partner. They went to the initial meeting with the network to discuss the theme of the pilot. George tells the network execs " Get this" ; it is a "Show about nothing". They look perplexed so he continues. A show about nothing; like what people do everyday.So they give them the show. Thats what the whole Seinfeld show was about; nothing. Best comedy show ever made. I turned my son on to it and he watches it every night twice a night. Once at 11 and once at 1130. Him and his friends can quote whole show dialogues word for word now.
