Subject: Re: Port air speed.IS BASED ON MAX POWER ON ISD Posted by mhammill on Thu, 04 Apr 2002 22:54:46 GMT View Forum Message <> Reply to Message

If you change the max power rating on the driver specs on WIN ISD to the power you use the air speed will drop proportionatly. I never use more than 50 watts so thats what I base my port dimentions on.Good luckMike H.
