I thought I'd also point this fellow out. I haven't read through all your compression tweeter compensation notes but I thought these pose an interesting option. PE# 260-160 Has the same 12db low pass & 18db high pass characteristics as the Eminence pxb with a built in L-Pad for the tweeter attenuation. I'd be inclined to replace the cheap pot with a fixed resistor once it was dialed in but might be a nice all in one solution. Any comments Wayne?
