Hi Wayne,I am going to make a pair of 2Pi's for my tube amps to go in a different room. If you could please send box dimensions and port dimension that would be great.would a Beta, or any other driver for that matter, be a better choice than the Alpha?I have some Motorola KSN 1016. the specs look similar to KSN 1038.1038 is the one, or no difference?is the spl of 97 for this speaker, a plus 3db of the two 94 driver?+3 for two of the same?Thanks!Bill
