Subject: higher than 6th order Bandpass? Posted by dbeardsl on Fri, 12 Apr 2002 16:49:57 GMT

Is there such a thing as a Bandpass enclosure that's higher than 6th order. Maybe one with say three resonating chambers? Not exactly sure how one would do this, but has anybody? I was just looking into making a real big 6th order sub woofer using one of the M252's and stowing it under a pooltable. Some graphs of the response look pretty impressive.
