Hi, wayneDo i need a compensation network together with the Theater 4 Pi with a kappa lf and a psd2002?You recommended the 1k6a filter to me wich should be for the 4pi with delta lf 12", but wich steepness must it have 10dB or 12dB.Could you tell me how to build the compensation network?You people are talking about gauge thickness of cable, could you tell me what thickness to use in metric?Thanks Erik.
