Hi Wayne,I haven't build a set of speakers before and with barely passable knowledge in electronics (the only electronic kit I built was the Foreplay), how easy is the theater 4 Pi to build if I can commision someone to build the cabinets for me? Also how much for the s/h of a paired kit of theater 4 Pi to South San Francisco?One last question, Wayne. Is it possible to built a crossoverless theater 4 Pis? Someone told me before that crossoverless speakers do sound better than one with x'over.Thanks,Edwin
