Subject: Zen with Four Pi

I built a Zen Select to use with my Thermionic Four Pi's and found that it just didn't have enough oomph for my taste. I could usually get it to go loud enough, but it just didn't have enough drive to make the music interesting. I went back to my modified Jolida 302a.Mike BorzcikPS--If anyone wants to buy a used Zen Select, let me know. :-)
