so a person has a decent chance of figuring out how to go about it? The 2 Pi's look incredible. There must be some kind of cyberinfection present here...we are now being programed back to enjoying smaller speakers...say it ain't so, Wayne. Adam, quick, post some 10 Pi pics as a "vacine" before we all go back to our single driver, 1cu.ft. systems...too scary to contemplate:)AWESOME VENEER. yeah, just kidding about the "small speaker" virus. I've been thinking some 2 or 3 Pi's might be easier to build, then ship to lala land for the daughter and her dot.com buddies to hear...Sam
