Hi Zeno look at Madisound's Eminence 151311 @\$79US pretty close to your  
Visaton fs/qes=119.375 fs=38.2, qes=0.32, qms=7.73, vas=299l, re=5, xmax=5.5mm,  
mms=60.1g, BL=14.9Le isn't specified but I'd guess around 1mH - goes out >3Khz on axis as direct  
radiator - am looking at it for inexpensive Karlson driver Freddy
