Hello. I don't know if you are the person who moderates this forum or if you are actually the person behind these Pi speakers. Please forgive my not knowing. In any event I think you may be able to answer my question. I do not see the Impedances listed in the areas where you give the specs of the individual speakers. Have I missed something here? Are they all the same? I suspect I just can't find the right place to tell me. It is an important factor to me and I suspect many others. If you could help me out here I would appreciate it. Thank you.
