Subject: question about r13 vs acoustic foam for dampening Posted by ray99 on Sun, 02 Jun 2002 14:55:31 GMT View Forum Message <> Reply to Message

Hello. I'm building a thermionic 3 kit. I noticed that parts express sells acoustic dampening foam that is in an egg crate pattern. One is 2.5inches base to peak thickness and the other is 1.5in base to peak. Is this as good as using r13 fiberglass insulation? is it better? thanks for comments. Ray
