Yeah, I must say I am growing fond of the sound of my 2002's. I think I just scored a pair of beautiful woofers from TC Sounds for my bass horns, and they'll be tossin out some serious output and I'll need a system to keep up with them :)Remember a while ago I posted that link to the plutonium, and said "how about THESE for some ten pi's"? Well, same 1200 ounce magnet, different design geared for sound reinforcement instead of car use...Adam
