Subject: CTS piezo w/ Eminence Beta coax? Posted by John Van on Wed, 19 Jun 2002 15:05:08 GMT View Forum Message <> Reply to Message

Has anyone tried pairing a CTS piezo driver (maybe the KSN1142) with one of the Eminence Beta coaxial woofers? I'm thinking the Bets 10cx, at 97dB/1W/1m would be a great matchup.Thanks.
