I'm bringing some of my standards; Bottlehead S.E.X amp and LM3875 chip amp. I think I'll bring the speakers I got from Fred too. "High efficiency speaker incorporating an Eminence Alpha 8 woofer and a GR Research T-6 tweeter in a 1.5 cu ft tower enclosure. Nominal impedance is 8 ohms, sensitivity is about 95dB. First order crossover. The enclosure is tuned to 54hz using a 4" id port."
