Subject: Re: Solutions for 5 cubic feet Posted by Wayne Parham on Fri, 21 Jun 2002 06:02:59 GMT View Forum Message <> Reply to Message

seem "too big" and they are well worth the size. Sealed alignments for the Delta 15 are underdamped if less than eight cubic feet. Six cubic feet is acceptable, but a ported alignment is better in all respects so it just doesn't make sense to run this speaker in a sealed cabinet. Run some response curves with Boxplot and you'll see what I mean.
