Subject: Piezo's vs. compression horns Posted by Wayne Parham on Wed, 10 Jul 2002 19:53:32 GMT View Forum Message <> Reply to Message

For what it's worth, I like the improved top octave performance of the KSN-1038 in the little speakers. The biggest disadvantage is that they don't match a compression horn in terms of total output, but these smaller systems only hit about 115dB anyway. So the output from a KSN-1038 is adequate, and you get improved top octave performance in the trade.
