Subject: Small sub Posted by LuxmanLover on Sun, 14 Jul 2002 17:35:08 GMT View Forum Message <> Reply to Message

I'm toying with the idea of building a set of subs to use with the professionial 4Pi's I'm building. I would like to use the JBL 2235 in 4 cubic foot cabinets. My concern is how much of a performance compromise it will be using that driver in that size of cabinet. I would appreciate input from anyone with experience with this particular driver.Kelly
