So that might be one reason that my ProAc Response 2.5 speakers are 83db/1W/1m efficient (Scan-Speak 18W/8535-00 and D2010/8513 drivers with bass down to 30-35hz). Could you send me the plans for the Theater 3 and 4 Pi in case I get the Delta 12LF or Delta 15 drivers in Germany?/Erik
