I'd suggest running a three-way, using a 90x40 conical horn loaded with a TAD 1101 or JBL 2123 for a mid and a TAD 2001 or JBL 2426 on a nice 90x40 horn on top. Another option would be to go with a TAD 4001, and run the crossover point down to meet the 1602.
