Subject: Re: 2 Pi's and the 20 watt resistor Posted by Wayne Parham on Thu, 01 Aug 2002 16:33:26 GMT View Forum Message <> Reply to Message

because they use a piezoelectric tweeter. If the capacitive load is a problem for your amp, then a 20 ohm resistor can be installed across the speaker terminals. Most amps don't need it, but it doesn't hurt to add either.
