Good points, Sam. I did put up a persian rug that one of my student's brought me as a gift (one of the few perks of education). It even looks cool in the room.I'll consider changing the HF caps, but I'd rather let it go for now. I want to see how they settle in. Besides, I have a few mods to make on the Billies.Wayne, I'll post some pictures when they are really done. My only (weak!) contribution is to bevel the port, instead of having it just a cylinder. The fronts are painted black, so I'll need to write you Wayne about getting a set of silver or white decals. How much are they? BTW, tthe port is an excellent application for polyurethane glue. Since it swells up, it fills any cracks. Cheers,Jason
