after reading this:http://www.audioasylum.com/forums/bottlehead/messages/50170.htmlBut I gotta say the Theater 4s did kick some major butt. Garland's Studio 2s sounded great too, they've almost got that single-driver thing going. All guided by about a ton of very fancy iron.Wayne strikes another blow at the wussy-speaker market!I'll order a pair of those 2s this morning, Wayne, black decals, please. And many thanks for your help and advice getting the (quasi-)Theater 4s up and running.John
