Hey Wayne,What about these inductors?They all have a bit lower DCR than the one you posted:Parts Express:# 266-816 \$3.75Specifications: • Wire Gauge: 18 • Core Type: Air • DCR: .32 ohms • Power Handling: 300 watts • Overall Diameter: 1-3/4" • +/- 2% tolerance. Made in the U.S.A. Erse Electronics (zalytron.com):.47mh • DCR- .131 • \$6.02 .55mh • DCR- .149 • \$6.59Other than price what would be the pro's or con's in using an "audiophile" or high quality inductor? I Know Solen and Alpha Goertz make a few flavors. The Specs. are on the Parts Connexion Web site. Any Thoughts?Curious,David
