Just for you I drove the old lady next door out of her apartment. The Paramours wouldn't drive the JBL's really loud but enough that her car was gone after a few minutes of Steely Dan and Moussorgsky and she never goes out!Maybe 90dB and then it started spitting.But It was a decidedly different flavor from the 4 Pi's.Mind you these are 2226J's in the 4.5cu. ft. 3677S cabinet with the 3677 horn (2618?). I would say that the sound is a little brighter, a tad more detailed and maybe a little less of a "lush" than the His Eminence.Somebody needs to climb in here and tell all about their Pro 7's.
