Subject: Re: 4Pi Pro crossover Posted by LuxmanLover on Sat, 28 Sep 2002 18:34:14 GMT View Forum Message <> Reply to Message

Solen's catalogue doesn't carry the exact values of inductors that the crossover calls for. They have .58 .62 .68 and .75 mH in 10 - 20 ga. wire, is ther an optimal "mix" that will not mess up the crossover.THX again Kelly
