A cabinetmaker friend just delivered the beautifully finished 3/4 cherrywood cabinets (It was worth the three month wait). They're also beautifully huge. So now it's time to get off my duff. I purchased all the drivers used, on the net, and none of them came with any hardware. Could someone please tell me the type of bolt used in mounting the JBL2445 driver to the 2380A horn? What type of hardware would you recommend for mounting the 2380A horn to the cabinet? What type of hardware would you recommend for mounting the JBL2241 to the cabinet? Gaskets?Thanks,Gerry Provenzale
