Wayne, Please send me the plans for the Studio 2's. Garland brought a pair to the last New England Valve Meet, and I'm very, very curious . . . I'm curious about the pair of Theatre 4's JLaPaire brought, too, but I'm a little short on room! Also - any thoughts on building them in birch ply rather than MDF? Would it call for a change in thickness, or is 5/8th" still the way to go? Thanks!

Keep your ears and your mind open.

Sept New England Valve Meeting
