I have a stupid question.. my daughter's CD players and MP3 players die rather quickly. The CD players just spin and stop working, or skip tracks, Even on brand new non-scratched CDs. All of the brands that she has the phone jacks come loose. Any ideas why she has such terrible luck. She's not stupid with technology at all. They are not taken near water and she sets them on the table or her lap when we travel. Does anyone have a good brand that's almost indestructible?
