Thanks John! I was real worried about the grilles, but my friend now has a baby girl so I need to get used to them. (plus I might want a pet some day) I cannot tell any difference at all, which surprises me actually, I was expecting to notice. One thing though, if you are playing SUPER LOUD you can feel them ring a little, but the whole house is rattling at 120 dB so it isn't an issue. (yes I wore plugs to get that close)Thomas
