Wayne, Thanks! So how does 36.5"Hx17"Wx14"D sound? I'll skip the stands. I imagine I'd use your 800hz@12db/oct xover, (correct me if there's a better choice), but I've no idea what the values would be for this box & woofer. The joys of going "off road". ;-)

Keep
your ears and your mind open.
