Subject: JBL 2426 Posted by bqc on Tue, 26 Nov 2002 23:11:11 GMT View Forum Message <> Reply to Message

I just bought a couple of these. The spec says that the top platewhere the horn is bolted to can be removed so that a 1 3/8 18 TPItype horn lens can be thread onto the 2426. Does anyone know howto remove the top plate? Do I just turn it counter clockwise realhard till it moves or do I need to unscrew 3 screws that are locatedon the bottom of the driver, where the binding post are located.Thanks
