I ordered the Ella yesterday. Apparently some parts are out of stock but should have it in a few weeks and certainly for Lima. 40 watts EL-34 or 50 with KT88/6550. But I plan to run it in Triode with about 15 watts. The 3677/Pro hybrid sounds so good with 30 vintage Fisher SS watts, I can't wait to hear them with SOTA tube watts. And of course I'll have the drivers in new Pi cabinetry for Lima, also.
