hi mike, save me one of those rooms. make sure it has 8 ashtrays and a large fridge. better still a garbage can filled with ice. in reference to khorns, do you mean klipsch or karlson?. i've got my karlson's sounding pretty impressive now. lush, with deep bass and liquid highs. it's a hassle taking them back & forth across the border. i'd schlepp them to lima but bringing them back requires too much paperwork. a raffle would be good or maybe romy will buy them. they have some unique qualities and now that the x-over and pre-amp are fixed they sound swell. playing jazz on them is like entering a time machine. bmar did a hell of a job on the cabinets. maybe bmar will feel like building another pair and bringing them down. i need all the room in my truck to load up on norh speakers for the ride home. i sold out in a week. anyways it will be cool to meet wayne and party with everyone. cheers, george12awg concealed in garden hose and priced at \$50 ft sounds best. really!!
