Hello Wayne, I would like to build a pair of the 2Pi Towers. I will be ordering the parts kit, do the plans come with the parts kit? If so I wouldn't bother requesting them now but if it will take a while to get the parts kit here I guess I could get started on the boxes sooner if you e-mail the plans to me now. Also, from what I have been reading here at the forum, boxes of this size would be better suited being build from ply-wood instead of MDF (I am guessing because of weight issues) ... do you agree?
