Wayne, I am awaiting the kits for the Pi2 towers. I have a question about modifing the box sizes. Keeping the 46" hight, how much would I be able to downsize the width from the 16" spec? Can I add to the 13" depth spec to make up for reducing the width? I would like to be able to get down to about 14" width if that is possible. Please let me know if this can be done and how I would modify the depth spec. Thanks
