Hi Guys,As I wait to build an active crossover for my Theater 4's, I was wondering if it was possible to modify the Eminence/Pi crossover to allow biamping? If so, could someone please describe what would be required? Thanks!GarlandP.S. What got me thinking along these lines is the great bass I've been getting with the 14W per ch. Heathkit. The highs aren't as good as with the Paramours so I'm thinking they might make a great combo in a bi-amped system! The Heath AA-111 is really a fast amp compared to my Paramours so I'm thinking the Paramours might like to free from having to do the Bass thing!
