May as well go for the Trifecta and post the question here a third time: anyone know the size of the woofer cab on the 19? I have the overall dimensions but I'm almost certain there are 2 cabs joined 'cause the total is 8.75 cu ft, too much methinks for the Altec 816a.811 horns, 2226J woofs, baltic birch substrate for Honduran mahogany veneer, Fender Yellow/Oxblood tweed grill cloth; off the drawing board and on to M.A.F. Have you seen this site from Russia?:
