I have two of these horns with DH1A drivers. I usedthem in my van in 1987, see pic. (today the van is history).My can was pretty medieval looking and the sound wasmenacing. Sounding like a concert on wheels, very clean sonicsand loud!http://dreadlordpk.50megs.com/cgi-bin/i/hellvan/system-2.JPGLast halloween, I took one horn/driver and placed it in thegarage and I broadcasted spooky sounds to scare the littleones trick or treating, people said they heard the screamsa few blocks away, more people came to my house to check itout.They are "fun" horns. heheIf you want to use there in your home, it would work greatif you had a large listening room, perhaps a listening roomthe size of a sports arena - hehe
