I plan on building some SET's myself. Just waiting on the money and deciding which one (SET) I will go with. I was thinking of the Paramours but I may do something a bit more powerful. I plan on matching with the Theater 4 or 7, it is a bit difficult to pass on the 2Pi Towers since they sound pretty darn good, ecpecially for the cost of about $300.00 complete. I do like the extra sensitivity of the Theater series. I just hope they sound as good, I know most here will recomend them over the Studio Series but I stiil like the philosophy and sound of a speaker with no XO. I will probably change my mind once I build the Theater speakers.
