---

my room is already booked. trying to get my buddy to fly us down in his cessna 172. the 6 hr drive is a drag. should be able to get there in under 2 hrs by plane. if i understand you, 75 ohm stranded core coax is the way to go. i'll be changing some cables soon. i also read you have to be careful when terminating this wire as some rca plugs are not 75 ohm compatible. cheers, georgeps. karlsons are being used as lamp stands now.
