Just a heads up that MCM still has some AR brand flat speaker wire on sale that is ideal for BIAMPING. The flat 4 conductors of 16ga. let you run both drivers from one cable, and they are 50 feet for $4.99. The normal 2 conductor AR 16ga. flat wire from Lowes measures some of the LOWEST pF/ft. I have seen, about 1/4 as much as traditional monster cable and zip cord. The flat white jacket lends itself to labeling with a felt tip marker also, and the 16 ga. conductors can fit into VINTAGE amp terminals without difficulty. A pair of 50 ft. spools, and I can biamp anything in the living room with ease. Sam
