Hello again! Well, i tried and tried, but i cannot find out the new value for Lc with a 4" port. I think i`m messing it up with the unit conversions. I hope you can help me, AGAIN. PiAlign gives me the following data: Encl Vol: 5 cu.ft. Encl Fr: 29Hz Encl Q: 2.48 Port Type: Cylindrical Lenght: 6.2" Area: 15 sq.in. Diameter: 4.48" I think thats all one needs to calculate the new port lenght. I want to make the port 4" in diameter. Which lenght would the port have then? Thats all. Sorry if i`m bothering you. Thank you for your help! Pilkar
