Subject: Which type of horn flare for small room?

Hi gang!Is there a particular horn type than is suited to a closer listening position? I'm looking for something that I can run a compression driver to 800 hz. x-over point with a listening position of no more than 12 feet from speakers. I've considered Altec 811's, JBL 2370's and the round Tractix horns. Any thoughts? Thanks! Jerrod
