Subject: 3" open cell foam insulation Posted by frog on Sun, 23 Feb 2003 15:28:25 GMT View Forum Message <> Reply to Message

I am wondering if I can use 3" open cell foam insulation instead of R11 or R13 fiberglass in my 2 PI speakers. I already have a few sheets of it, and I hate working with fiberglass. If anybody knows if it will work I would love to hear from you. Thanks.
